Klaviyo campaign template: prize competitions (black + purple)

Emmanuel Marquez · Email Developer · Concept build for a fictional brand, made for this proposal. Copy, design and hand-coded Klaviyo HTML.

Desktop (640px)

Mobile (375px)

Why it's built this way

- **Urgency up top:** closing time, ticket price and how many entries are gone, all in the first screen. On competition sites those are what drive the click.
- **Live text over the hero art**, with a VML fallback for Outlook, so the offer reads with images off. On mobile the art moves under the button so text never sits on the image.
- **HTML progress bar** (no image) shows tickets sold. It's easy to update per send.
- **Reusable modules:** hero, progress bar, 3-up competition cards (stack on mobile), trust strip and compliance footer. Each new competition is a copy-and-swap, not a rebuild.
- **Dark by design:** the color-scheme meta is set to dark so Apple Mail leaves the palette alone, and a Gmail blend-mode fix keeps button text white.
- **UK compliance in the footer:** 18+, UK residents only, a free postal entry route, a link to the T&Cs and a responsible-play line, plus the Klaviyo unsubscribe, preference and address tags.

Campaign rhythm for each competition

Send	Audience	Subject line / preview text	Notes
Launch	Engaged 90 days	"£5,000 cash, tickets from 99p" / "Only 4,999 entries. Closes Sunday 9pm."	Full template: hero, progress bar and the other live competitions.
Halfway	Clicked launch but didn't enter	"64% gone already" / "Your odds get shorter every hour."	Shorter email with the progress bar up front.
Closing reminder	Engaged, not entered	"Closes tonight at 9pm" / "Last chance at £5,000."	Sent on the day of the draw. A Klaviyo flow can handle this if entries are tracked as events.
Winner + next draw	All subscribers	"We have a winner!" / "Plus 3 new competitions live now."	Social proof (with the winner's consent), then the next launch.
Welcome flow	New sign-ups	"Welcome! Here's how it works" / "Free entry route, draws and instant wins explained."	Explains how the draws work, builds trust, and offers a first-entry deal if you run one.

How I'd measure and improve it

- A/B test subject lines (urgency vs. prize-led) and hero layouts in Klaviyo, then compare click rate and placed-order revenue per recipient.
- Sunset unengaged profiles so Gmail and Outlook keep the sends in the inbox.
- QA every send in Litmus / Email on Acid (Apple Mail, Gmail, Outlook) plus real-device tests before it goes out.

Renders are Chromium screenshots of the template with mock data. The full source (prize_promo.klaviyo.html) is attached and ready to paste into a Klaviyo HTML template. Prize art is placeholder; your images drop into the same slots.
