Klaviyo welcome email + flow plan: wellness tonics

Emmanuel Marquez · Email Developer · Concept build for a fictional brand, made for this proposal. Copy, design and hand-coded Klaviyo HTML.

Mobile, light (375px)

Mobile, dark mode

Design and copy decisions

- **One job per email:** welcome #1 delivers the discount and points new subscribers to a first product. Everything else supports that.
- **Offer above the fold on mobile**, with a unique single-use code from `{% coupon_code 'WELCOME10' %}`, so codes can't be shared on coupon sites.
- **Education without health claims:** ingredients are described by taste and use, and the FDA disclaimer sits in the footer. That matters for supplements, especially products made for kids.
- **"Not sure where to start?"** gives three entry points (best seller, everyday, kids) instead of the whole catalog.
- **Live text, not one big image:** headline, offer and CTA stay readable with images off and pass accessibility checks.

Build

- Hand-coded tables, inline CSS, 600px; the 3-up product row stacks on mobile.
- Dark mode palette with logo swap; VML button for Outlook desktop.
- Klaviyo tags: `first_name|default`, coupon, `{% unsubscribe_link %}`, `{% manage_preferences_link %}`, organization name and address.
- UTMs on every link so flow revenue shows up per email in GA4 as well as Klaviyo.

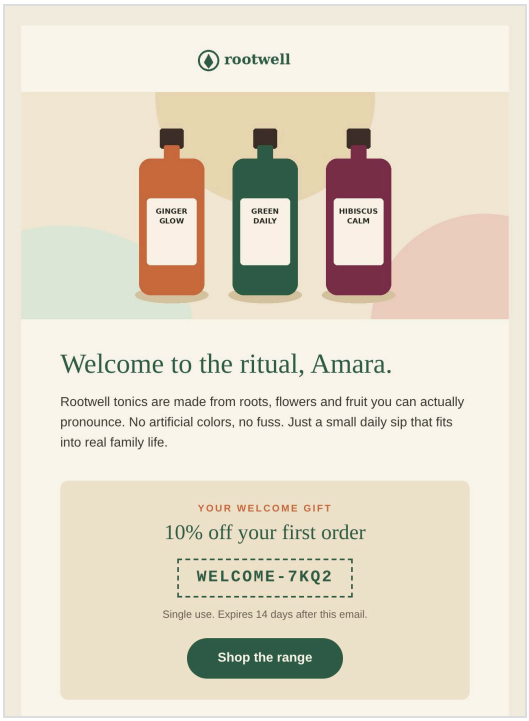

Flow plan I'd set up (welcome, abandoned cart, post-purchase)

Flow / trigger	Timing	Email and subject line	Logic
Welcome series Added to list (sign-up form)	Immediately	#1 "Your 10% welcome gift is inside" (this email)	Unique coupon, expires in 14 days.
	Day 2	#2 "Why we start with roots" (brand and ingredient story)	Conditional split: skip if Placed Order since starting the flow.
	Day 5	#3 "Your code expires soon"	Only for people who haven't ordered; shows the code again and the best seller.
Abandoned cart Started Checkout	4 hours	#1 "Still thinking it over?" with dynamic cart items	Flow filter: no Placed Order since starting; 30-day re-entry limit.
	24 hours	#2 "Your cart is saved" plus an ingredient FAQ	Discount only for first-time buyers (profile property split), to protect margin.
Post-purchase Placed Order	Day 1	"Thanks! Here's how to get the most from your tonic"	Split by first vs repeat order; first-timers get the how-to and storage tips.
	Day 10	"Pairs well with…" cross-sell	Shows products they didn't buy. Kids' product for anyone who bought Little Sunshine.
	Day 25	"Running low?" replenishment reminder	Timed to a typical bottle lasting about a month; exits on reorder.

Before anything goes live

- Review the current Klaviyo setup: list and sign-up form, Shopify integration events, existing flows, deliverability (authentication, engagement-based sending).
- QA every email in Litmus / Email on Acid across Apple Mail, Gmail and Outlook in light and dark mode, plus test sends to real devices.
- Set flow filters so nobody gets the welcome discount and an abandoned-cart discount on the same day.

Desktop render (640px, top of email)

Renders are Chromium screenshots of the template with mock data. The full source (wellness_welcome.klaviyo.html) is attached and ready to paste into a Klaviyo HTML template. Product art is placeholder; your product photography drops into the same image slots.
