EMMANUEL MARQUEZ

E-Commerce & Shopify Marketing · Web Production · Klaviyo & Lifecycle Email

Saratoga Springs, UT · Open to remote · (813) 323-4016 | emmanuelg.marquez@gmail.com | Portfolio: emmanuelgmarquez.com

SUMMARY

Web production and e-commerce marketing specialist with 6+ years building, launching and QA'ing customer-facing digital content for enterprise brands, including award-recognized Bank of America email work. Trained in Shopify storefront development (products and variants, collections, tags, metafields, theme sections and Liquid, discounts and promotions) and experienced running Klaviyo flows and campaigns for DTC brands. Known for clean pre-launch QA, accessible front-end builds (WCAG 2.1 AA) and clear SOP documentation that keeps launches on schedule.

SKILLS

Shopify: Products, variants, SKUs and pricing; automated and manual collections; tags and metafields; theme sections, blocks and Liquid; theme customizer and preview/publish workflow; discount codes, automatic discounts, bundles and gift-with-purchase; URL handles and redirects; sales channels
E-commerce marketing: Landing pages, promotional calendars and seasonal resets, merchandising for discovery and conversion, Klaviyo flows (welcome, abandoned checkout, browse, post-purchase) and campaigns, A/B testing, segmentation
Web production: Semantic HTML, CSS, JavaScript, WordPress (custom PHP templates with ACF), Figma-to-code, Git
QA & accessibility: Pre-launch and go-live checklists, cross-browser and mobile testing, WCAG 2.1 AA (alt text, contrast, focus states, form labels, heading structure), bug reproduction and escalation, staging and preview
Reporting & tools: Campaign and site performance readouts, Excel, PowerPoint, Power BI, Jira, Workfront, Hive, Litmus, Email on Acid; Salesforce Marketing Cloud, HubSpot, Braze, Mailchimp
AI: Uses approved AI tools such as Copilot for drafting, QA checklists, SOPs and everyday production tasks

PROJECT

Corvelle Concept Store · Shopify merchandising demo Nov 2026

Fictional haircare brand storefront, designed and coded end to end

- Built a storefront with metafield-driven filtering (hair type, routine step), inventory-aware sorting that drops sold-out items and badges low stock, and variant-level stock messaging on product pages.
- Configured promotional logic: free-shipping threshold, automatic gift-with-purchase that adds and removes with the cart total, and a minimum-spend discount code.
- Added site search with synonym groups (frizz / smoothing / humidity) and a zero-result fallback to best sellers; wrote a metafield-driven Liquid section with schema settings.
- Met WCAG 2.1 AA basics (skip link, labeled inputs, visible focus, focus-trapped drawers) and documented a pre-launch QA checklist covering SKUs, channels, discounts, redirects and feeds.

EXPERIENCE

Email Developer Dec 2023 – Present

Tamman Inc. | Client: Bank of America

- Build production-ready, responsive and accessible HTML/CSS for Bank of America within a multi-stage review, QA and approval process.
- Contributed to Bank of America work recognized with Gold, Silver and Bronze awards (credited to BofA's ECS team).
- Own pre-release QA of links, layout, rendering, personalization and approved copy, reproducing and fixing issues before deployment.
- Deliver accurate builds across concurrent launches on tight deadlines with marketing, creative, QA, PM and technical teams.

Salesforce Marketing Engineer Oct 2022 – Nov 2023

Next Level Solutions | Client: THREE Insurance

- Turned business requirements into working Salesforce Marketing Cloud lifecycle programs reaching about 150,000 customers.
- Built segmentation, data extensions, SQL audience queries and dynamic content; kept data complete so templates rendered correctly.
- Diagnosed data, automation and configuration issues, documented root causes and maintained production standards and SOPs.

Lead Email Developer Oct 2020 – Oct 2022

Snow Companies | Pharmaceutical brand campaigns

- Led development for regulated pharmaceutical brand campaigns, building to approved creative and copy.
- Built a reusable, modular component system for consistent, accessible rendering, cutting turnaround on new launches.
- Owned builds from approved creative through coding, QA, revisions and handoff; documented team development standards.

Front-End Developer Jan 2020 – Oct 2020

Socius Marketing | WordPress websites

- Built and maintained responsive production websites in HTML, CSS, JavaScript and PHP, including custom page templates with Advanced Custom Fields.
- Managed theme and plugin updates on live sites, validated every change after publish and fixed regressions across browsers and devices.

TRAINING

CodingPhase — front-end development and Shopify theme development curriculum (HTML, CSS, JavaScript, Shopify Liquid, theme sections and metafields)
