Dear Exactius Hiring Team,

I'm applying for the CRM Production Manager role. I build and QA lifecycle email hands-on: Braze campaigns with Liquid personalization, Klaviyo flows and segments, and Salesforce Marketing Cloud journeys, automations, AMPscript, SQL and data extensions (THREE Insurance, about 150,000 contacts). I hand-code the email HTML and CSS myself and currently build production email for Bank of America.

I'm available across European client hours with full US overlap.

Emmanuel Marquez
